)

I am 21 years old, I am a last year student of Faculty of Science and Mathematic Diponegoro University, Semarang, Indonesia. My hometown is Desa Ploso RT 2 RW 3 No. 33, Kecamatan Jati, Kabupaten Kudus. I live on Desa Jurang Belimbing RT 03 RW 04, Kecamatan Tembalang, Semarang 50275 which is the place of my boarding house during studying in Diponegoro University.

One of my passions is giving care to others, such as care to education, health, culture, and environment. To be a smart youth is my step to giving contributions in take action and applicative it. I have joined international events such as 5th Youth Peace Ambassador Training in Thailand and now I have joined as a member in MDMC (Muhammadiyah Disaster Management Center) located in Yogyakarta, to do my action plan, to predict about disasters happening in Indonesia with the statistics data and MDMC Program Child Disaster Awareness for School and Communities (CDASC).

I have joined social service (Bakti Sosial) initiated by senior high student organizations in 2009 in Kudus City, Central Java, Indonesia. We made a social event. It was one day. The one-day-event was sharing food for fasting break (Buka Puasa) to homeless people, and beggars. In 2012, we had a social program with title "Statistics Care". There were two programs, we visited an orphanage and blood donation. In November 2012 I made a student organization to make communities from the student leaders in Diponegoro University to join the program to care and help people who have hearing disability. The name of the program was **Blue Tape**, it has meaning blue as a symbol of disability and tapeis , a symbol of caring for others.
