Others are being asked...Email to darryl@eubios.info

Notes: The AUSN Masters in Bioethics and Global Public Health (MBGPH) program is an innovative bioethics graduate program started in 2014, which has the highest student population of any Masters in Bioethics program globally. The PhD in Bioethics, Sustainability and Global Public Health program launched in 2016 similarly is now the largest PhD bioethics program in the world. Faculty come from all around the world, and are global thought leaders, dedicated to a transformation of the quality of teaching and research in bioethics globally with a decolonised approach to wisdom. There will be interviews and guidance for prospective students to AUSN with Darryl Macer after the conference. This training will count as credit hours for the AUSN degrees, and one of residential Intensive Training Programs to graduate from the AUSN programs. Participants can take it as a stand-alone professional development course as well, though having a degree in this emerging field should increase your salary and job opportunities! There are substantial tuition support programs available making the fees affordable, refer to www.ausn.info
