

Mr. Kiran Adhikari (Nepal)

(sunlightforce@gmail.com)

I am a Young Researcher, Author, and Amateur Astronomer since 2010. I am working to promote astronomy and physics on the behalf of JKARC- Jamuna-Keith Astronomy Research Centre and NPSA- Nepal Physics Students Association. I'm 24 Years old. I am a Youth Peace Ambassador trainee, and I've attended the Seventh Youth Peace International Training Workshop, Nepal in January 2014.

I am the Founder/President of NPSA and JKARC and National Representative of International Association of Physics Students. Although I am a researcher majoring in Physics, my passion is to change the concept of youth as well as society and nation why science and technology is important for nation

This is why I established the JKARC and NPSA, NPSA is the first physics students organization of Nepal as well as NPSA is the first organization which is in the National committee member of IAPS- International Association of physics students from Asia.

NPS and JKARC, and together with my team, we were able to organize our first event: Total Solar Eclipse observation program in Nepal on November 2012.

Regarding my personal hobbies I have Passion in research about our universe and I love to teach people about discovering of universe. I want to be a famous author on theoretical physics, my only aim is to win a Nobel Prize in physics from Nepal

I believe in philosophy so I want save animals, as I think in this universe all animals have equal rights to live in this universe. I always follow my quote 'our thinking is our mind and our mind is our universe''
