Purposes

- Hein `s theory about public art says that, art can gather people together: it can convene them as a group such that individuals discover the interests they have in common.
- From opponent view of this theory Arendt and Dewey says that struggle among ever-changing interest groups would not suffice to enrich experience, build communities, or carry out democratic communication.

Purposes

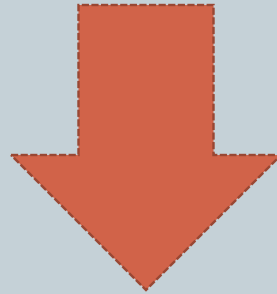

- Art therapy:
- It may surprise you to learn that art can be an effective tool in mental health treatment.
- As an expressive medium, art can be used to help clients communicate, overcome stress and explore different aspects of their own personality.
- in artistic self-expression helps people to resolve conflicts and problems
- An artist can not create a masterpiece if doesn't feel and understand the subject deeply.
