

Mr. Robin (Indonesia)

(Robinkwok69@gmail.com)

I come from Pontianak city, West Borneo province, Indonesia. I am studying Informatics Engineering, at the State Polytechnic Pontianak in the 5th semester. For now, I am currently enrolling on Buddhist activist community on Aryasasana Buddhist Centre West Borneo province as the president of education and training commission, and I am also an activist in Triratna Buddhist temple Pontianak city. In the campus, I also enrolling in science and technology extracurricularly.

In September 2013, I joined APSF (Asia Pacific Student Forum) – University of Indonesia, Depok. There were 3 topics of this student forum that I remember. First is education, second is environment, third is social entrepreneurship. The second is AFLES (Asian Future Leaders Summit) 2013 on October. This event gave some seminars and that the end of the program we had to present the result of our observation.

At this time in the middle of winter season in Nepal, I join Youth Peace Ambassador (YPA7) Workshop Training. I could gain great ideas, education and perception of peace concept based on the youth and the experts. For this chance, I would like to make an education of tolerance education program, so all of people in the world, especially the country who are very plural don't need to face any chaos because of the difference cultures that they have. So, every single people with different background could live in harmony.
