

Mr. Sugiono (Indonesia)

(sugiono1401@gmail.com)

Well, I will begin by introducing myself first. I was born in Pekanbaru on January 14th 1993, the capital city of Riau province. I am currently living in Pekanbaru (Indonesia). This year will be my second year as a student at the Islamic University of Riau (UIR). The program that I am attending for almost three semesters is a Bachelor degree (S1) under Teacher Training and Education Faculty (FKIP).

It is my second time to join an international program, with different themes and content. I have to write my intention, why I wanted to join this program, 7th Youth Peace Ambassador. I am a youth. I have big intention to help people. I would like to introduce peace itself based on the perspective of an Indonesian student. I want to share the idea and give contributions to other delegates in order to define peace in a global scope. I want to learn how the other delegates make a deal with the conflict in their country and how they create a peaceful life and try to implement their ways in my country. I want to be a sponge so I can adsorb as many positive things and lessons, and exchanges view with the other delegates. I want to build a new link and friends, and international connections by knowing them selves, culture and language.

As a youth of Indonesia, I also want to show to the country that I am worth to become the example of Indonesian youth, and become one of Youth Peace Ambassadors by bring the lessons which I gained from the workshop to make a difference in my country, Indonesia.

I believe in this forum I'll get knowledge about 'peace' and leadership skills, where we know that the world is not currently in a state of peace. Everywhere there are so many conflicts, both domestic and foreign conflicts. And I am sure this forum will give me a lot of knowledge, advice, efforts to ease tensions caused by the conflict. I can learn about many circumstances on conflict and creating peace. In order to develop the organizations and also enhance the quality of the human resources inside of the organization that I lead or join. We realize that youth people should be able to create their own field of work, and directly or indirectly help their country to reduce violence and increase peace.
