

Mr. Wahyu Ibnu Nur Huda, (Indonesia)

(wahyuibnunurhuda@gmail.com)

My name is Wahyu Ibnu Nur Huda. I am a student at Yogyakarta State University and I am currently enrolled in the 6th semester of the Electrical Engineering Program, specializing in Control and Automation. In my life I have a motto that I always keep up: “We never know something until we try it”.

I am very curious and passionate about how people relate each other through many kinds of interaction, communication and cooperation in the term of interdisciplinary studies. Furthermore, in this globalization era, international relations are not dominated by the state actors anymore but spread to grass-root actors (multi-track diplomacy). Actually it makes me to join Youth Peace Ambassador International.

Indonesia maybe is becoming a very democratic country. Why?? Actually it is because we have so many cultures and ethnicities that became one with a word “Bhineka Tunggal Ika”. It is something that make me believe that my country has a will of PEACE. Through diversity we unite, through nationality we became one, and through difference we together make the world better.
