MANY OF WORLD'S MANGROVES ARE IN INDONESIA

FIGURE 3
Percentage of world mangrove area by country, 2005

Indonesia : 19%

Indonesia	19%
Australia	10%
Brazil	7%
Nigeria	7%
Mexico	5%
Malaysia	4%
Cuba	4%
Myanmar	3%
Bangladesh	3%
India	3%
Others	35%

Do YOU KNOW ?

Indonesia Ministry of Enviroment (2008) :

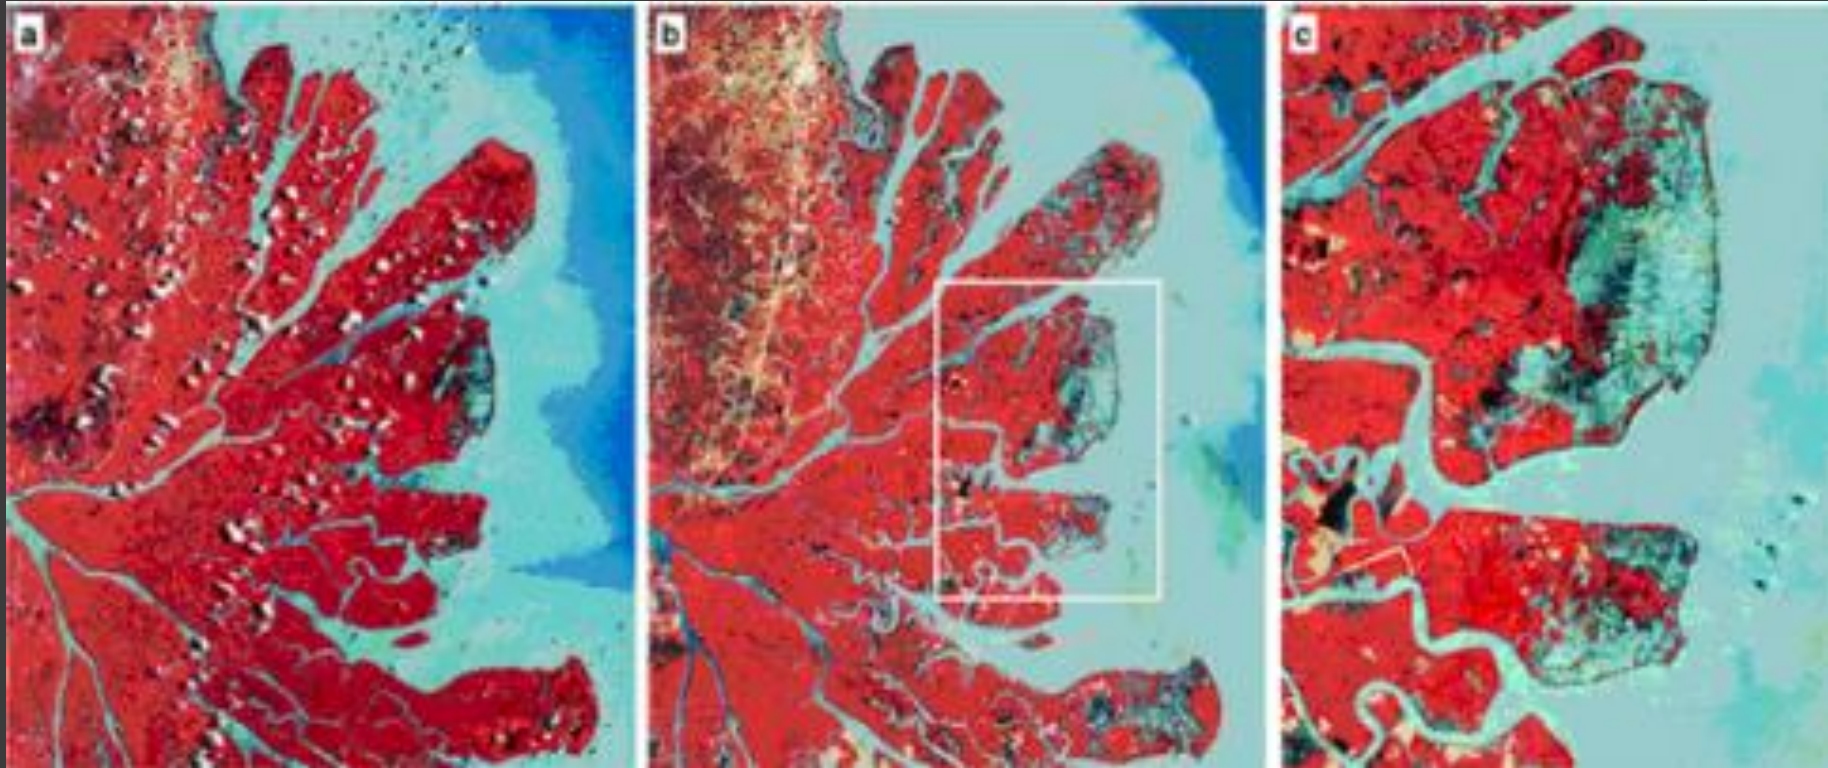

Data for 2000 :

Total area of Mangroves: 9.2 million ha

Those in good condition: 2.5 million ha

FAO (2007) : 3 million ha.

Fact of Mangrove Reduced in Mahakam delta, East Kalimantan

Background

- Environment damages has occurred, and created serious problem recently.
- It is needed to solve problems which must be reached by human.
- Social issues experienced by the YOUTH.
- It needs care from each stakeholders

Our Project :

- National Seminar and Training with theme “*Care to environment and care to the others*”
- Seminar will be held with the concept giving training for the participant, youth training, social training, and environment at Diponegoro University
- Inviting experts of education, social, and environment.

The Goals of the seminar

- Giving training and socialization about the youth, society, and environment.
- Giving awareness to the participants related with the environment damage has occurred recently.
- Giving awareness to the participants to give care to the others and build the peace.

*The **CONCEPT** of seminar*

- Training
- General lectures
- Action project
- Practice to Environment
- Visit to Orphanage

During the seminar there will be cultural shows from several cultures in Indonesia, that will be presented by students in Diponegoro University

BUDGET

- Mangrove seeds : 100 USD
- Transportation : 500 USD
- Meals : 800 USD
- Rent the Building : 300 USD
- Administration : 50 USD

TOTAL

1750 USD

Obstacles

- Difficulty to invite the YOUTH from universities in Indonesia.
- Lack of financial support and fund for support us to implement the seminar.

Indicators of success

- Bringing more than 100 YOUTH participants from all universities in Indonesia
- Getting new YOUTH with new spirit for the better Indonesia environment (focus on Mangrove repairing)
- Getting more fund after seminar,so the fund can be donated to an orphanage

Conclusion

- We have planned to hold a “National Seminar” with the theme “Care to Environment and care to The Others”
- With the concept inviting the experts from 3 important points (environment, social, education and culture)
- Giving training, general lectures, real action (planting the mangroves), and visiting orphanage).
- Cultural event that can make the seminar more interesting.
