

ACTION PLAN

made by: CemerlangPrinting@ogorIndonesia

Muslihudin Sharbinie
Proposed in 5th YPA Training Workshops
Thailand, 6-14 November 2012

BACKGROUND

1. The dolphin slaughter is continuing
2. Protests happen around the world, some are in aggressive, racism and impolite ways
3. The local people are disturbed
4. Leads to biodiversity lost
5. Dolphins meat is poisoned by mercury
6. Alternative based-solution is needed

PROBLEMS STATEMENT

1. Lack of people working from inside

Most of the protestors are working without involving the Japanese people, without considering Japanese culture and tradition

2. Lack of solution based-approach

Dolphin hunt in Taiji, Japan is a part of their way of living and stopping the practice without proposing alternative is impossible.

This action plan is expected to be part of the solution rather than part of the problem

AIM and OBJECTIVE

- Aim: Ending dolphins slaughter
- Objectives:
 - To raise awareness through peaceful, respectful and solution based-approach
 - Creation proposal as alternatives

TIMELINE SCHEDULE

NO	TIME	ACTIVITIES	EXPECTED OUT PUT (S)

	Total	USD 2,700

EXPECTED BUDGET

NO	SOURCE	AMMOUNT
1	Team	USD 2,400
2	Personal	USD 300
Total		USD 2,700

CONCLUSION

An underwater photograph of several dolphins swimming in clear, bright blue water. The dolphins are captured in various positions, some swimming towards the camera and others away. The lighting is natural, highlighting the sleek, greyish-brown skin of the dolphins and the clarity of the water.

As the dolphins are killed in Taiji, Japan and protests opposing the practice are continuing we need a respectful, peaceful and solution based-approached is urgently needed.

Peace building in Taiji: save dolphins and people is expected to be part of the solution to the problem. It is focused on working with Japanese people ,from inside as they are the only who can change it.
