

Mr. Deni Welfin (Indonesia)

(deniwelfin@gmail.com)

I'm an Undergraduate Student of Universitas Gadjah Mada, Indonesia majoring in Agronomy. I like photography and travelling.

In my hometown, volcanic eruption, earthquakes, tsunami, flood and other disasters are common and make so much damage. Many buildings are destroyed and thousands of people died because of that. I had experience to raise fund to replant trees after the volcanic eruption. I also participated in the Looking Beyond Disaster Charity Concert with my friends in campus to collect books and help make a library for the kids in Merapi. I hope in this forum I can improve my knowledge about disaster. We shouldn't only regret what just happened but we must rise from disaster.
