

Mr. Fernando Sihotang (Indonesia)

(fernandosihotang1@gmail.com)

Born in Bandung, Indonesia, 21st June 1990, I moved to Medan, North Sumatra, in 2000. Banda Aceh is the next city from Medan. The earthquake and tsunami in 2004 in Banda Aceh, and also the earthquake and tsunami in west Sumatra, inspired me to be involved more in volunteer programs related to youth programs and disaster. I am attending my 1st international youth program in this LBD3 in Kobe, Japan, and he is really interested in everything related to mitigation of disaster, especially in natural environmental change. He hopes by joining this program he can get more confidence, experience, knowledge, and more independence by meeting different people from different places who have had different experiences and can also share and make contributions for youth organization.

I am studying for bachelor degree in chemical engineering in Riau University.
