

1. Introduction

The **International Peace Park** of the **International Centre for Peace and Development Ethics** at Kaeng Krachan is an independent Body, with cooperation agreements with Oran Patana Foundation, the Regional Unit for Social and Human Sciences in Asia and the Pacific (RUSHSAP), UNESCO Bangkok, the Fulbright Academy of Law, Peace and Public Health, Eubios Ethics Institute, the Asia-Pacific Forum for Ethics and Social Justice, and the International Council for Philosophy and Humanistic Studies. Further agreements are being developed.

The inauguration of the Park and Centre was at the time of the Fifth UNESCO Youth Peace Ambassadors Training Workshop (YPA5) on 8 November 2012. Most of the 100 participants at the conference planted a tree in celebration of the event, and in the hope to build world peace and cross cultural understanding. This file includes photographs of the trees with the names of those who planted the trees, mostly taken in December to January. Each tree has a sprinkler to irrigate them, and many trees are now significantly bigger than the images here. The file will be updated over time.

In addition there are many older trees, the species of which are listed in a separate file. The peace park has 20 peace plaques in English and Thai writing, selected from those sent by the youth around the world, and unveiled on the opening. It is planned to also have a collection of more medicinal herbs. This is a community garden that will develop over the coming decades.

2. Trees planted since 8 November 2012. What they will become:

Acacia Auriculiformis, golden wattle
(Height: 15-30m)

Indian mahogany tree ((Height: 10-30m)

Plum (Without pruning, the trees can reach 12 meters in height and spread across 10 meters).

Tamarind (maximum crown height of 12 to 18 metres)

Broad leaf mahogany (At heights of up to 60 metres)

Burmese Ebony (*Scientific Name: Pterocarpus Macrocarpus*) (Height 30 m).

Rubber tree (typically 30-40 m tall)

Queen's flower, Queen's crape myrtle (Scientific name *Lagerstroemia macrocarpa* Wall) They range in size from medium shrubs to trees that approach 10m tall.

Golden shower, Indian laburnum (10–20 m tall with fast growth).

Indian Cork Tree (*Scientific Name: Millingtonia Hortensis*) (18 to 25 m high; spread 7 to 11 m).

Iron Wood (*Scientific Name: Hopea Odorata*) (reaching 14m height and living as long as 1,500 years).

Sterculia foetida L. Bastard poom, Pinari (growing to 40 m in height and 3 m in girth)

A few pictures from getting ready
