

SAFETY EDUCATION

*...a disaster risk reduction programme in
communities across Europe and Africa*

By

Oludolapo Taiwo Fakuade

Background Information about Action Plan

- There are frequent migrations of disaster victims from Africa to Europe and within Europe
- Need to increase awareness about the several benefits of disaster risk reduction, sustainable development, the community-based approach to reducing risks influenced by international standards & best practice
- Develop and Improve cross-cultural disaster risks reduction knowledge and resilience planning

Objectives of Action Plan

- To understand and reduce individual, group and community risks
- To promote and catalyze change towards disaster and emergency risk reduction
- To encourage careful individual, group and community planning towards reducing risks
- To encourage, coach & train more youths into active and responsible roles for community disaster risks reduction
- Develop applicable Framework for sustainable development within each community

Approach to delivery of action plan

Prevalent Disasters in this regions include both Human-induced and Natural disaster. So delivery approach will be to:

- ❖ Collaborate with emergency agencies, local authorities/governments and NGOs to deliver disaster risks reduction programmes to communities or victims of disasters
- ❖ Train and coach Youths who can deliver the safety/DRR education
- ❖ Deliver series of sessions, workshops and trainings to inform, educate and develop knowledge/skills in preventing, coping and reducing disasters

Costs & Budget

Since the approach to delivering this action plan is to first seek partners. The project is expected to incur minimal costs, but any cost(s) incurred will be on:

- ▣ Venue hire for training, workshops, and coaching youths
- ▣ Printing and materials for disaster and safety education
- ▣ Travel costs and other logistics

Project Outcome

- ❖ Reduction in human-induced disaster
- ❖ Increased and informed preparedness for natural disasters
- ❖ Youth development – better understanding of disaster & risks reduction, community involvement and commitment to sustainable resilience
- ❖ Encourage and mobilise more youths for international forums and increased active involvement for resilience in Europe and Africa

*The change you'll like to see
in your community starts with
you, never underestimate
your impact.*
