Subtotal					Rp 3.863.000

TOTAL

TOTAL OUTPUT	
	Rp 38.120.000

TARGET IS USD 38,120

Past International Conference

- Topic : A Design of Environmental Management to Build Sustainable Future & Role of Conservation
- Date : July, 1st 2013
- Speaker: Aaman Sulchan (Utrecht University)

Past Environmental Activity

- Date : July, 2nd 2013
- Venue : Ngadas villahe (2100 ssl)
- Speaker : Mr. Jatmiko (Local NGO)

Example of Cultural Study

- Date : July, 3rd 2013
- Venue : Ngadas village (2100 ssl)
- Performance : Local People

Social Analysys

- Date : July, 4th 2013
- Venue : Ranu Pane, Mt. Semeru
- There are people from 4 religions at one village (Christian, Hindu, Buddhist, Islam)

Trip to Mt. Bromo

Purpose to see volcano mount and cultural ceremony of Tengger

How about I-WoCa 2014?

PARTICIPANTS

Youth all over the world from any kind of background

LOCATION

University of Brawijaya
As a place of international
conference

LOCATION 2

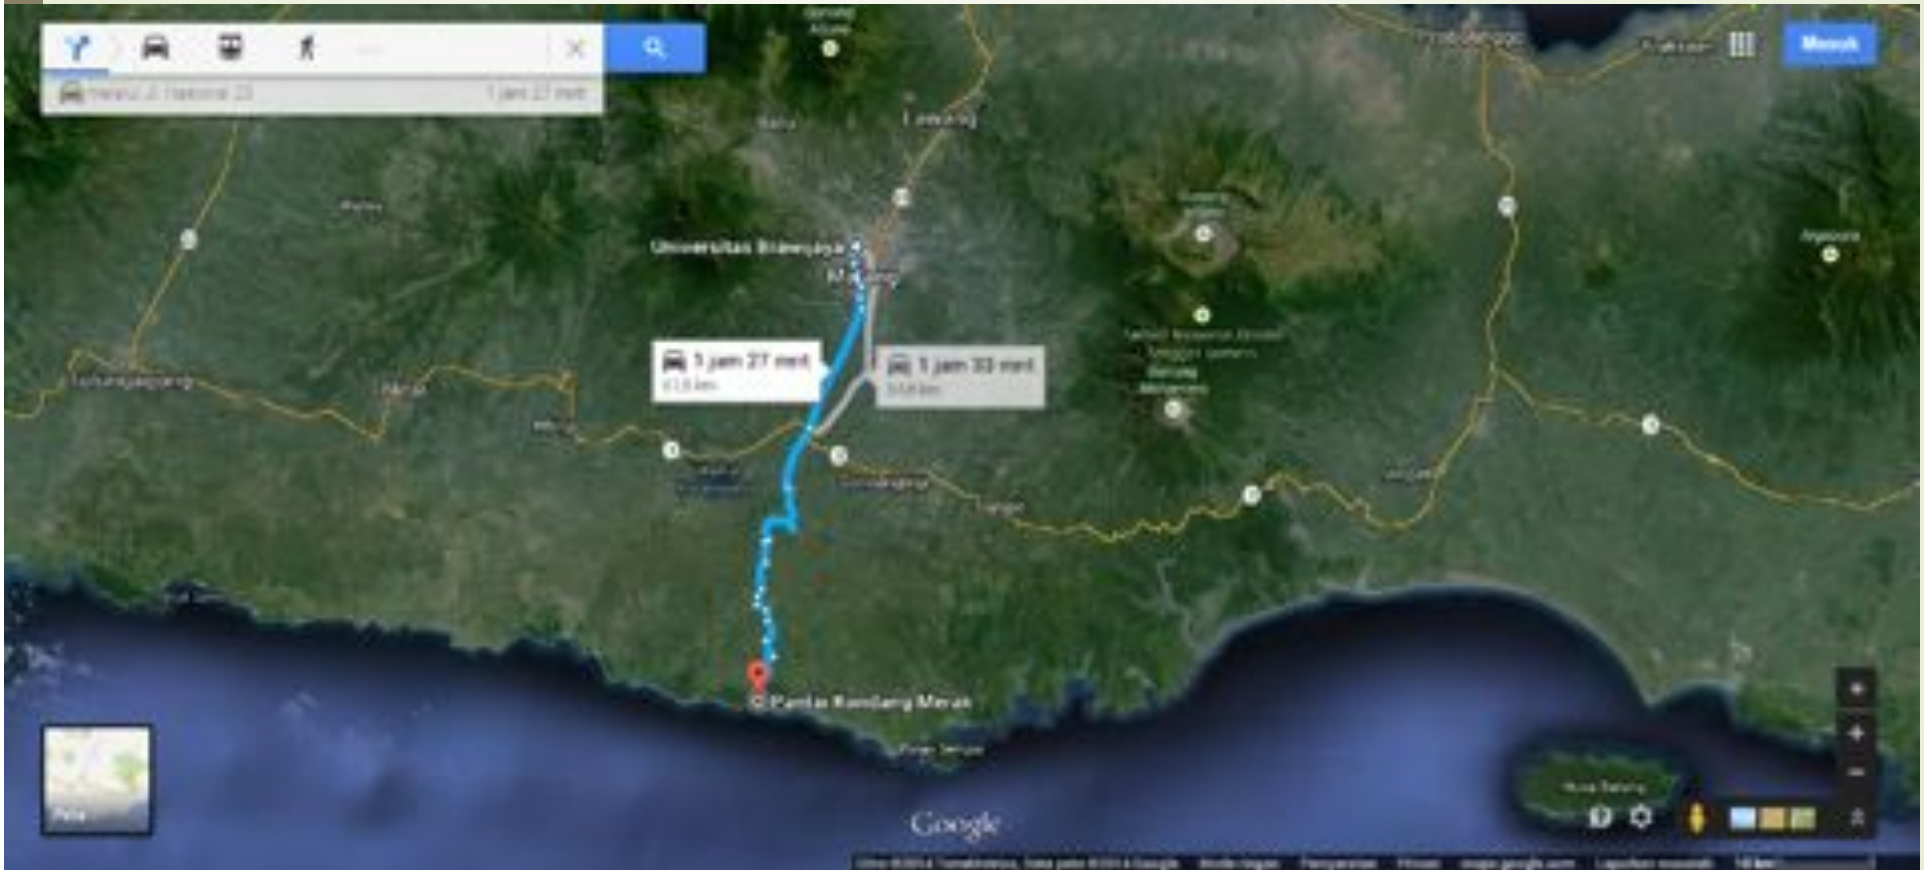

Sumberngepoh village
To have community service and learning
about agriculture

Location 3

Sumberngepoh village
To have learn about disaster and role of
marine ecosystem

MAP INFORMATION

2014 International Conference

- Topic : Maximizing Effort to Get Back World Heart & Greeneration (Green Generation) to Lead Green Future
- Date : August, 21st 2014
- Speaker : dr. Gamal Albinsaid & Gracia Paramitha

Teaching Children

1. Venue : Sumberngepoh village
2. Subject : Environment & Peace

We are teaching them to care with the environment, respect each other among diversity.

Green Campaign

- ▶ Green campaign to engage local people to protect their environment.

Participant paint board wood which is we can find campaign inside.

Trash Bank

- We try to make trash bank. Participants did it for local people. But, it needs more maintainance. After I-WoCa it isn't continued again by local people.

Sharing with Local People

- All participants share everything about culture and environment at their own country to local people

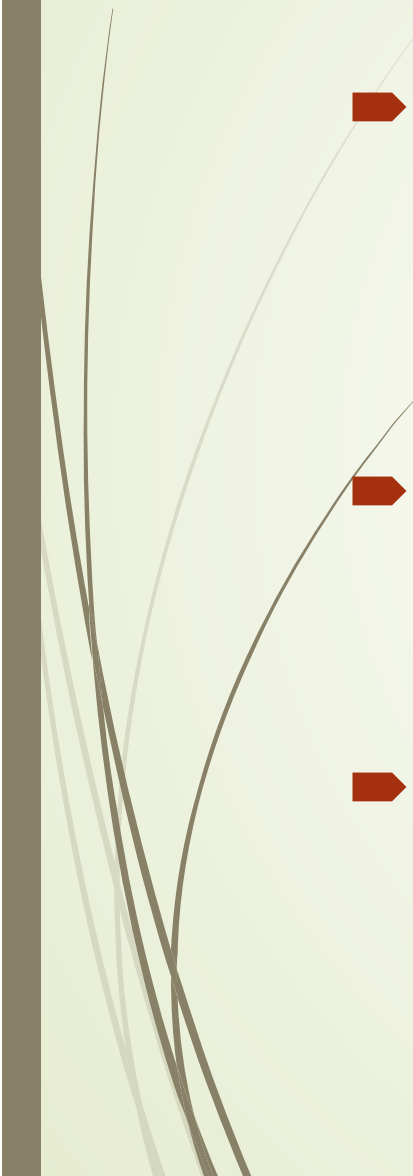

Village Spectacular Show

- ▶ Participants perform their culture such as dance, singing a song etc. and explain it to local people

Kondang Merak Beach

- Kondang merak located at Sea South of Malang facing off the open ocean. It belong to red zone of disaster cause of tectonic plate.
 - Kondang Merak is a complex ecosystem that we can found at Java Island
 - It's a conservation area about 1,125 Ha
- 

Learning about Disaster and Marine Ecosystem

- ▶ We invite Dhira Kurniawan, S.Kel., M.Sc. an expert of geology and conservation.
- ▶ They're learning about mangrove, coral reefs, seagrass and other ecosystem.

Mangrove Restoration

- *Rhizophora sp.* Species we plant as primary mangrove that can be break water.

Forest Exploration

- We can find 124 species of butterfly
- We can find 4 species of tiger
- We can also find 11 species of eagle
- etc.

Book Drive

- ▶ Participants brought at least one book to be donated to the library at Kondang Merak

Coral Transplantation

1. Making substrate made from cement, sand, Styrofoam
2. Attaching the coral reef into the substrate
3. And put it inside the water

The species is *Acropora sp.* It can grow up faster than other about 11 cm/year

Radarmalang

The screenshot shows the homepage of the Radarmalang website. The main headline is "Relawan 6 Negara Tanam Terumbu Karang-Mangrove" (Volunteers from 6 Countries Plant Coral-Mangrove). The article text mentions that the event is part of the International Working Camp (IWC) organized by the International Association of Students in Agricultural and Related Sciences (IASARS) at Universitas Brawijaya (UB). It also notes that the event is held at the Panti Kandang Merah, Baiturrahman Malang. A sidebar on the left features a "Tiket Murah Liburan?" (Cheap Travel Tickets?) advertisement from Traveloka.com. On the right, there is a section for "Event Radarmalang" listing various events like "Pendaftaran Inisiasi Deteksi Bavit 2014" and "Ayo, Bantu Detak Jalan Tradisional".

Their Opinion during I-WoCa

Nissa Furqonita

August 27

thanks for all experiences and happiness. we spend 6 days with beautiful and tired trip. Kondang Merak Beach is the one example of best place which has pure diversity of mangrove ecosystem among south part of Java coastal area. It has really beautiful view, many unique species. unpopular place but still need to be explored. It took about 3 hours from Malang City (68 km) to get there. Planting mangrove and transplanting coral that's awesome experience... although my phone still in service because the waves... Yeah, that's a good time that I have. — with Nur Ayu Fitriani and 19 others.

Opinions

Dare to Dream, don't forget our history

THANK YOU
