

Mr. Lenin Khanal (Nepal)

(Lenin.khanal@gmail.com)

I was born in Kapilvastu, the place where Gautama Buddha was born. Recently I am living at Kathmandu, capital city of Nepal. I am currently studying a Bachelor of business administration (BBA) 7th semester in Tribhuvan University.

It is my first time to join an international program, with different theme and content. Now, I have to write my intention, why I joined this program, 7th Youth Peace Ambassador Training. I have some reasons for this. I am a youth. I have big intention for helping people.

I would like to introduce the peace itself based on the perspective of a Nepali student. I want to share the idea and give contribution with others delegates in order to define the peace in global scope. I want to learn how the others delegates make a deal with the conflict in their country and how they create a peaceful life and try to implement their ways in my country. I want to exchange culture, religion, views, language with the others delegates. I want to build the new link and friends and international connection by knowing their religion, culture and language.

I also want to increase my interpersonal skills through this program. It's a very good program that teaches us about the action plan and many more things. It's not what you say; it's how you say it.

My motto: If you want to walk fast, walk alone. But if you want to walk far, walk together..!!!!!!
