

Mr. Harun, (Indonesia)

I would like to introduce myself. My name is Harun, I'm 21 years old. I'm a student of Sports Sciences at Yogyakarta State University, Indonesia. My concentration is in Sport Physical Therapy and Rehabilitation. I'm active in student organizations in my campus, and currently the vice president of Student Executive Board of Sport Science Faculty. I'm also active in Student Research Unit in my campus. My research is about children injuries, and I am founding a Student Sport Study.

I love to join the social action community. I have a program called "Anti Smoker Children Cadre". This program aims to educate children about the risks of Smoking to save them from becoming victims of secondhand (passive) smokers. Then, a few years ago, I carried out a Therapeutic exercise in some villages in Gunung Kidul Yogyakarta to improve health conditions of the community.

My passion is to have a meaningful life and be useful to other people. I believe our life will be meaningful if its useful to other people. I love peace, and I love to see and make people happy with a smile.
