

Eng. Rishad Raihan (Bangladesh)

(rrdream101@hotmail.com)

I was born and raised in Bangladesh. Currently I am a student of AUSN Masters in Bioethics and Global Public Health (MBGPH). Previously I completed my BSc (Hons) in Software Engineering from University of East London, FTMS campus Malaysia.

I have attended the Youth Looking Beyond Disaster (LBD7) conference in Nepal. I am also a member of Bangladesh Bioethics Society (BBS). Due to my interaction with people from different cultures through my studies, BBS and LBD7, I have learned to appreciate the different cultures that our world has to offer and the good we can do if we all work together.

My goal is to attain a better understanding about the world and the people we share it with, which will help me develop skills and knowledge that I can use to make a positive contribution to my community.
