# Introducing

**Education Disaster for children is most important to reveal death rate. Education not only gives from the teacher but also from communities who have experience about disaster management and disaster trauma healing. The problem from the lack disaster education has to be overcome to prepare our young generation if the disaster happening and also Lack of awareness about disaster resilience in Indonesia**

**Lack of access towards disaster knowledge**

**Lack of agent to solve this situation**

After a successful collaboration with Indonesia Youth Network Toward Resilience Disaster (Indonesian-Japan)

We would like to be one of part to reach the network program with **KNCU** and we hope there are goals from our relationship such as:

Disaster preparedness → disaster education,  
disaster drill, new technology

Disaster recovery → emergency response,  
volunteering activity,

recovery and reconstruction

Environmentally Education program
