#### Reasoning

- A society is unified when it has a common goal, a common objective.
- By using photography as a platform we are in the process of uniting these set of people with a common aim under a single umbrella.
- Why we are focusing on photography here, because this is an arena where you can project your story to the world, you can express emotions and feelings.

## Objectives

- To bring in people from different ethnic groups under one organization and provide a platform not just to learn photography but also to interact with different people from different races and ethnic groups.
- •To reach out to people who are willing to learn photography but cannot achieve it due to financial issues.

#### Timeline

#### Methodology

**Project Initiation** 

Photography Session

Photography Workshop and Photowalk

#### **Problems**

- Financial constrains Funding for the project would have to be raised in house and a major part will be sourced from Pictor Pix.
- Time management Since students are involved in the project, managing both extra curricular projects along with education would become an issue and hence time management issues can be sorted out by prior planning.

#### Conclusion

- "Provide a fish to a man, you would provide him a meal, teach him how to fish and you provide him food for a lifetime."
- We need to focus more on youth empowerment and self-development and make them less dependent on aids.
- Photography could someday be used as a tool to empower a person financially.
- Photography will unite like minded people of different ethnic groups under a common platform.
