PROBLEM STATEMENTS

- Corruption is one of the crucial problems in democracy and development agenda, especially in Indonesia (Rank 100 of 183, 2011, Transparency International CPI;).
- Corruption is one of indicators for *The Failed States Index* (J.J. Meissner, The Fund for Peace).

PROBLEM STATEMENTS (cont)

- Corruption Eradication Commission (KPK) is a new hope in Indonesia's anticorruption agenda, but some politicians and corruptors always strike and try to break them up. KPK needs public back-up.
- Be good (be great) is not enough. We need people who spread their goodness to others.
- Everyone is stakeholder to fight corruption.

DON'T LOSE HOPE !

Indonesia's *Corruption Perception Index (CPI)*
by Transparency International

2009	=	2.8	of	10
2011	=	3.0	of	10

It's very slow, but we got progress (+0.2) ☺

Certainly, it's still not enough. We need more for
better Indonesia.

Let's act!
