Mangrove Tree

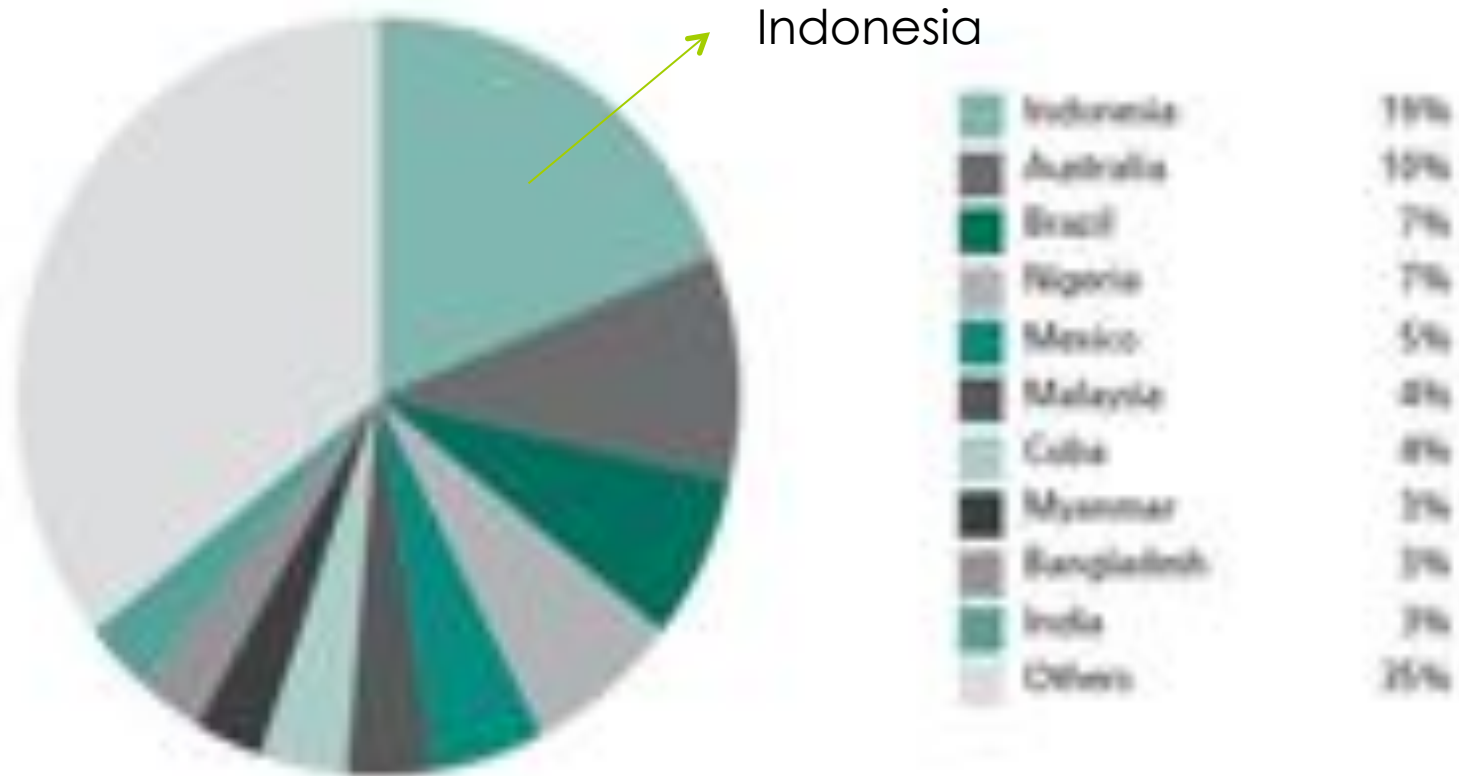

mangrove forest / mangrove according Steenis (1978) is a forest vegetation growing among the tidal area.

Advantages of Mangroves

- ◉ To protect beach from abration
- ◉ Keeping the coastline
- ◉ Accelerate the formation of new land
- ◉ As a protection against waves and currents
- ◉ As the river bank or coast protection
- ◉ Habitat for fishes, shrimps, and other organisms surrounding the mangrove habitat
- ◉ Place for seeding mangrove trees
- ◉ Mangrove fruits can be made into mangrove snack
- ◉ Mangrove bark can be used to make batik clothes

The highest area of Mangroves in the world – 19% in Indonesia

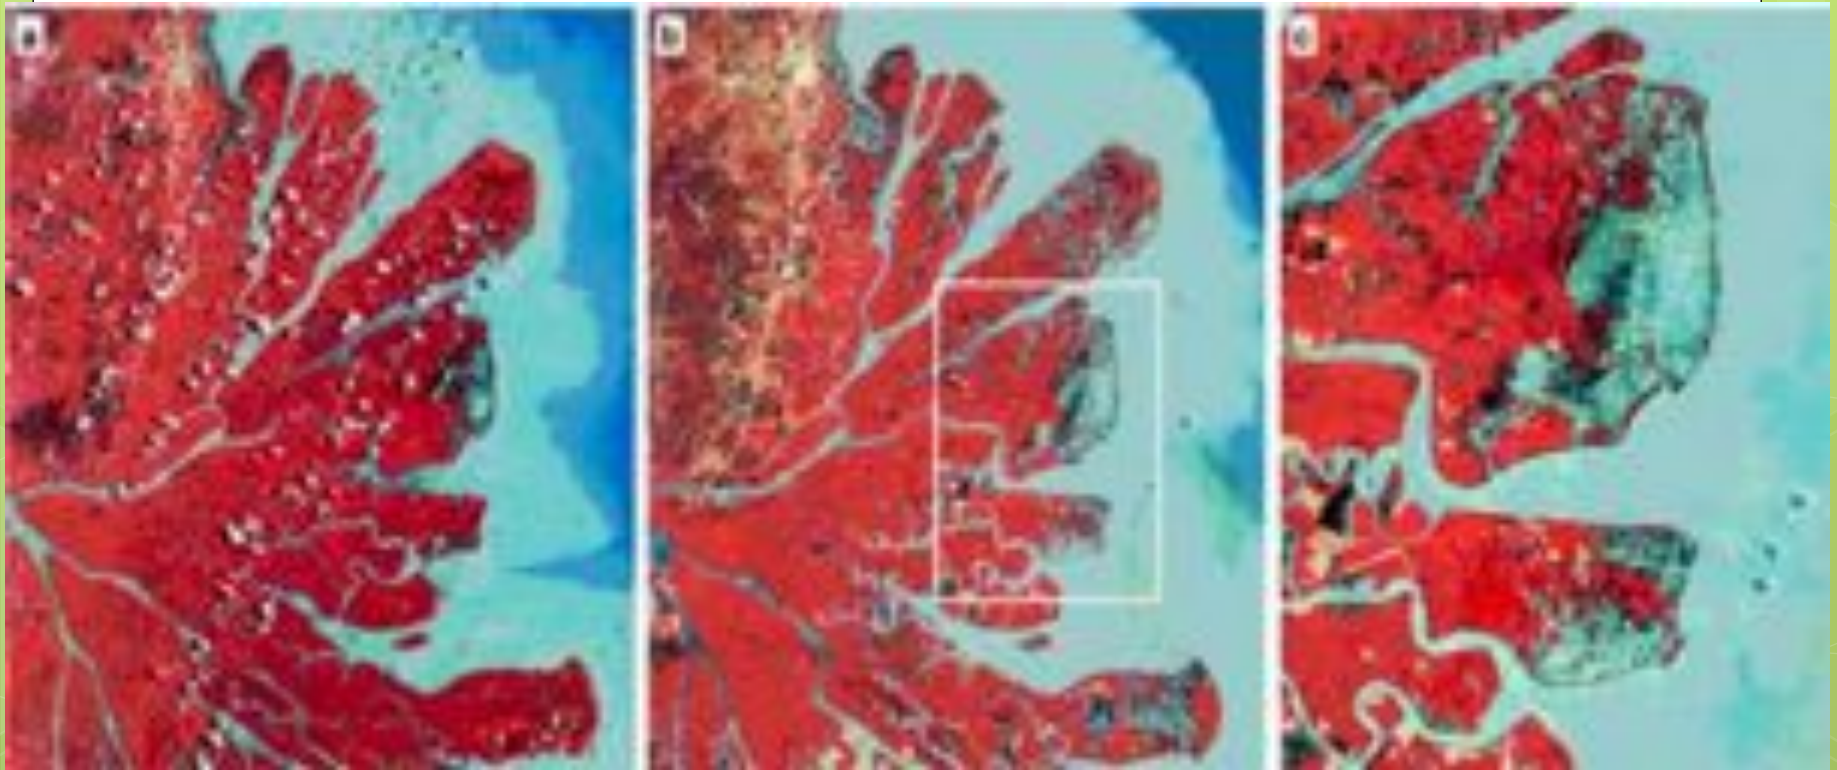

FIGURE 3
Percentage of world mangrove area by country, 2005

DO YOU KNOW ?

- ◉ **Indonesia Ministry of Enviroment (2008) :**
- ◉ Data for 2000 :
- ◉ Total area of Mangroves: 9.2 million ha
- ◉ Those in good condition: 2.5 million ha
- ◉ FAO (2007) : 3 million ha.

Fact of Mangrove Reduction in Indonesia, e.g. 2008,2010,2012

Background

- Environment damage has occurred, and created serious problem recently.

The Concept of Projects

9. Travel Island to Island

The Concept of Projects

10. Outbound Camp

The Transportation to Karimunjawa Island

- Speed Boat

BUDGET FOR EACH GUEST

No	Name	USD
1	Transportation	20
2	Hotel	50
3	Meals	30
4	Programs facilities	150
5	Adminstration	25
6	Documentation	25
	Total	300 USD

Every participant has to pay 300 USD for all facilities for one week

Obstacles

- Difficult to invite the YOUTH from universities in Indonesia.
- Difficult to invite participants from other countries
- Lack of financial support and fund for supporting us to implement the project.

Indicators of success

- Bringing more than 100 YOUTHS from all around the world.
- Getting new YOUTH with new spirit for the better Indonesia environment (focus on Mangrove repairing)
- Participants can get to know more about Indonesian culture and environment
- Getting more fund to implement the projects
- Tourism site for local, national, and international people.

Conclusion

- We have planned to make program “ Mangrove Tourism in Karimunjawa Island” to collaborate with the goverment of Indonesia and other organizations which have relations with this project.
- The concept of project is about 3 important points (environment,sosial, and education)
- Giving mangrove training and real action planting.
- Culture event can make the events more interesting.

Evaluation

- The result of planting mangrove trees in Mangrove Park Karimunjawa Island will be published in social Media, website, and blog.
- We will continue this project with cooperation BTNKJ (Balai Taman Nasional Karimunjawa) for develop mangrove park
