

# Education of Earthquake Disaster

## *Edu-ED*

- CHILDREN COMMUNITY
- Sumatra Island, Indonesia

# Introduction

Disasters triggered by natural hazards have claimed more than 600,000 lives and affected more than 2.4 billion people worldwide over the past few decades. Any developmental initiative achieved so far whether scientific or material progress has not made any great impact in decreasing the loss of lives and properties caused by disasters.

Education disaster for children is most important to reveal death rate. Education not only gives from the teacher but also from communities who have experience about disaster management and disaster trauma hilling. The problem from the lack disaster education has to be overcome to prepare our young generation if the disaster happen. ( *UNCRD Project, Reducing Vulnerability of School Children to Earthquakes in Asia-Pacific Region – Shimla, India. And United Nations Children's Fund* ).

# Scopes

The program scope is for the children. The theme of disaster education is respect to emergency of earthquake and earthquake panic.

# Volunteer

*To socialite our activities for introducing our action plan we need volunteers who have high commitment for implementation about education disaster. The recruitment of volunteers need to be made up of youth from the local region as well as from outside the region. The programs from volunteers are;*

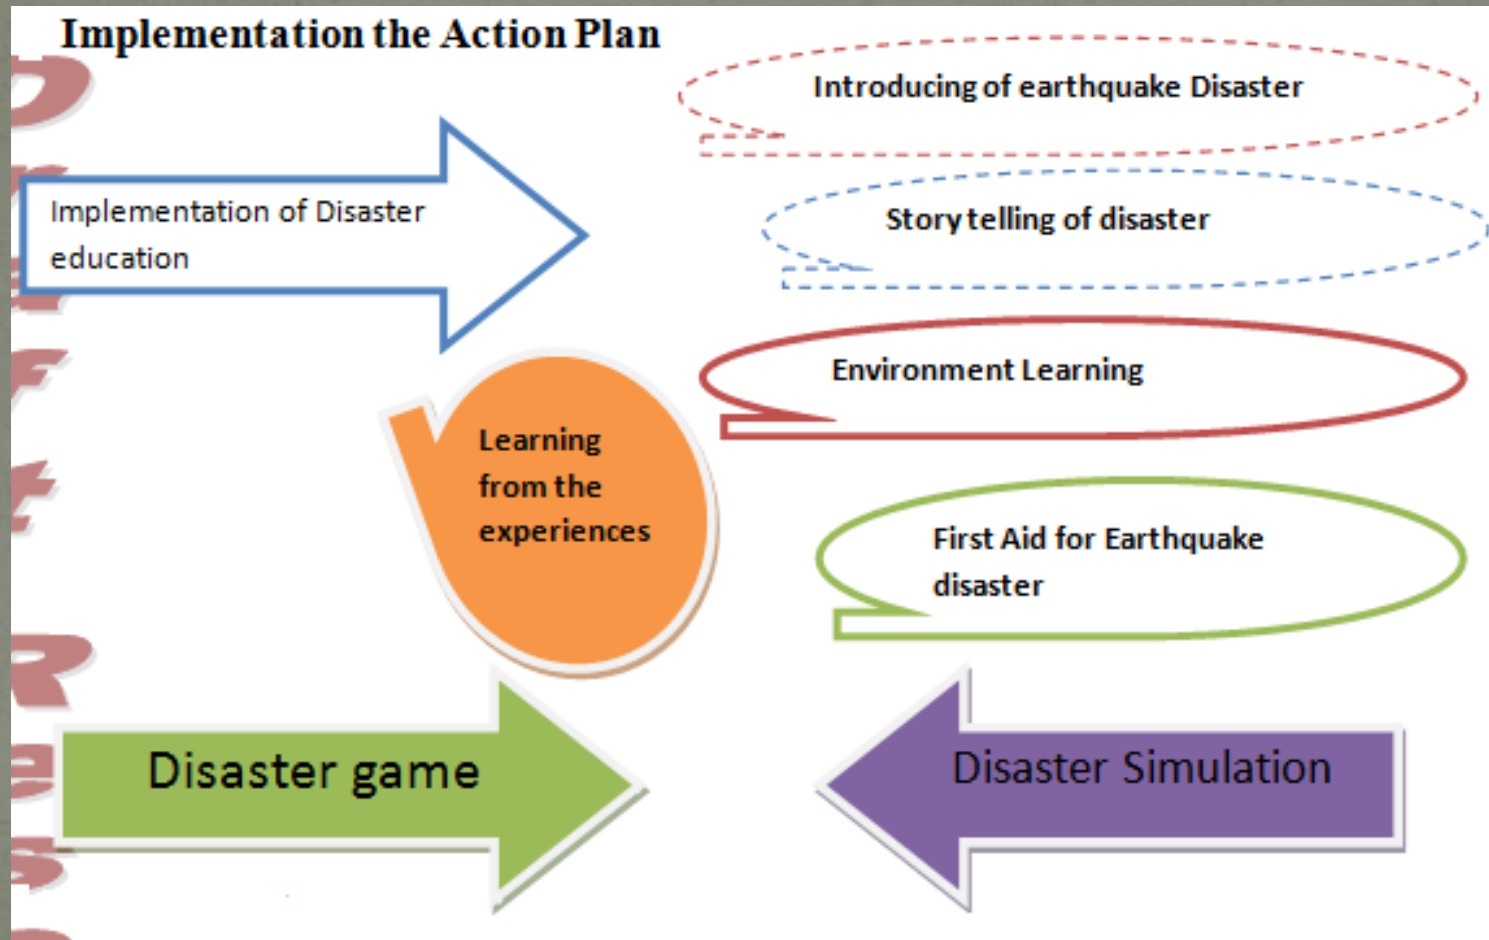

- Empowering of local volunteers*
- Volunteers training programs*
- Volunteers discussions club*

# Socialization Education Curriculum Disaster

Every action plan we need to socialization in school from play group school until junior high school.

# Implementation the Action Plan

# Fund Rising

- **Social trip** from overseas Indonesian, who want go social holiday with the community and helping the community to give the knowledge and sharing experience for the community and children. The guest can pay accommodation just US\$200 for 2 week it was including food, field trip, rent dorm and donation for Community. But its not including Flight cost.
- Seminar and workshop program or International Program
- Proposing the proposal to the company who want to be our donator for our program.
- Society Donation

# Goals

1. To enrich the knowledge for the children about disaster by giving disaster education
2. to socialize about the first aid to prepare them when disaster happen.
3. Investment In Education on natural disaster education to young generation in the future.

# Conclusion

The Application of natural disaster education starting from the younger generation. Beside that, the role of schools in the community is very important and it would be befitting to call schools as cradles of the society.

Children are a dynamic and powerful force of change and are supporters in creating awareness in the community. They can contribute in a unique manner with energy and vision to find local solutions. School children should be encouraged to take up tasks which make them realize their importance as necessary stakeholders in the change process.
