

# Prevention is Better Than Cure

19<sup>th</sup> August, 2012  
By Rimesh Khanal

---

# Purpose

- To make the people of community teach to get practice knowledge to use preventive measure.
- To prepare Mitigation and Preparedness plans at cluster community level

# Expected Results

- ❑ Community will be aware of different types rescue measures.
- ❑ Community will be able to plan and implement different infrastructure schemes
- ❑ Community will be able to secure their life.

# Objectives Goals

- ❑ To prepare the community to reduce the effect of upcoming disasters
- ❑ To minimize to loose their life.
- ❑ Community members can help each other very conveniently

## Key messages

- ❑ Preparation before the hazard can save many lives
- ❑ Assets and livelihood can be saved without huge investment but with little cooperative feelings.
- ❑ Build your capacity to reduce your vulnerabilities

Problem	Solution	Step for solution	Who will do it?	When?
Flood Disasters	Reduce the Risk of Disaster	Establishing Community Alert Alarm, Advertising in the daily consumable item like Milk Packet, In free space of Taxi about the solution.	Volunteers & NGO/INGOs	Before Monsoon.

## Timeline

About my project we have started about the community alert alarm system from March 2012 (Before the Monsoon Season). And we are in the process for Other advertising or promoting on Taxis and Food Products.

## Funding

- It should be made by the Nepal Government Disaster Reduction Unit.
- From NRN (Non Residential Nepalese).
- International Organizations.

# Supporters

- ❑ Global Warming Neutralization.
