

## Mrs. Monika Shecilia (Indonesia)

(Email: [monicashecilia@yahoo.com](mailto:monicashecilia@yahoo.com))

I was born in Pekanbaru, Indonesia, on 5<sup>th</sup> January 1993. I'm now studying chemical engineering and my activity as a college student makes me learn about every side of life. How to be brave and be wise to solve the life problems. I love meeting new people, so that I can explore my sociality to create good relationships. Every way that people speak, move and express is an interesting thing, so we can learn through a difference. By making a good relationship with all people we met might bring us to the peace closer.

My current obsession is to be useful for every person, not only the people I know in Indonesia, but hopefully the people I meet in the world. Just a simple want but it's not easy to make it happen actually. I'm on my way to create it step by step through the Looking Beyond Disaster program, so I can give my contribution to make an action plan for peace beyond disaster. Contact or find me on [monicashecilia@yahoo.com](mailto:monicashecilia@yahoo.com) and also on my Facebook "Monika Shecilia".
