Reasons why we chose this

- **We see healthy people discriminating these people in many places**
- **We have actually seen and met some of these people**
- **We want these people to be part of the society**

The problems

- **The importance of this problem has not yet been fully recognized**
- **They are given some financial aids but not enough care**
- **Still some people are against them**

What we can do

- **People around should pay more attention**
- **Give them a chance to be a full part of the society**
- **Help them do what they like or what they are specially good at**

STOP!!!!

Be more concerned !!

If people are concerned about the handicapped people, they shouldn't do these kind of careless things.

For example this is a textured paving block to guide blind people where they want to go, but if people park bicycles on it, it could cause serious injuries to the blind people.

Building Confidence

We believe that confidence is what make people big. Some Down's syndrome children are very bright but don't have the confidence to stand up, because most are labeled as being unable to do anything, and are told to be silent in a box. So what we can do is, meet, talk and get to know them so that we can know what they like to do or are able to do. In that way, we can support their hobbies, which leads them to be more confident to themselves.

Suggestion of an art class

Art is something that **anyone can enjoy, and there are many autistic children who have great talent of it. And we don't want them to waste their time doing nothing. We want them to improve what they have.**

For example, we visit the facilities where there are handicapped children, and gather who like to draw or paint, and let them draw what they like. We will take pictures of those and put them on **official homepages or on the walls of where ever is possible, so that the people will get to know more about their talent. Therefore, it could be the first step to the beginning of their succeed in their life.**

What is peace??

Getting subsidy and physical disability certificate might seem like a good thing to us but, more than that, receiving and giving care and love is even more needed in our society.
